

## ABSTRACT

The invention relates to a wiper device, in particular for a motor vehicle, comprising a wiper arm (12a, 12b) and a control unit (18a, 18b) for controlling the position ( $\alpha$ ) of a wiper blade (10a, 10b) in relation to the wiper arm (12a, 12b), in accordance with at least one operating variable ( $\beta$ ), in particular of an operating position of the wiper arm (12a, 12b). It is proposed that the wiper arm (12a, 12b) has a freedom of movement ( $\gamma$ ) achieved without articulation, which is capable of producing a contact force.
